

# Toddler Time

Toddlers are constantly in motion and determined to explore and learn on their own. Toddler Time will provide a safe and loving environment that will help your child grow through age appropriate activities geared toward language development, cognitive development and socialization. The children will have opportunities to sing, dance, play, do arts and crafts and much more.

Toddler Time is not just for the children but for the parents as well. We know how important it is to have time to relax and regroup so you can give your toddler the parents they need. We want you to trust us to take the best possible care of your child during this time. With love and compassion we hope to make the transition from mom to Dropins a success.
